

AN INSIGHT INTO NAVODAYA

The most awaited **BOOK** is **OUT!**

To all my readers, friends, navodayans, site visitors I'm really happy to tell you that my **FIRST BOOK** is finally out in the stores.

It took me about 11 months from my first key stroke to the first hard copy in my hand at the age of 20. These 11 months have been quite busy and full of learning.

➤ **Why I wrote this Book?**

I was one of the students who were taken into the NAVODAYAN schooling system through a special lateral entry scheme that was started that very year itself. So being in the ninth class I was quite grown up to 'feel' the difference of 'teaching' and 'receiving' education in Navodaya and citybased schools. By the time I officially walked out of the school gates forever after completing my secondary school education, the system had injected into me a number of values, skills and abilities that I think I would have never had, had I been in a normal city school.

➤ **What's there in the book?**

Three million students have been and are related with Jawahar Navodaya Vidyalayas. The book describes the life of the students, teachers and all other concerned with one of the biggest and most successful schooling system of India. It's not a story of an individual but an image of the system itself. It tells how the students are groomed in the institute, the obstacles they face, the struggle they do and the voices they raise. Book enables the reader to visualize the scenario of the schools pointing out the reasons of failure and success of the system. It's the very first book of its kind giving out firsthand experience of growing and learning in the prestigious institutes.

So **What Are You Waiting For? Read you copy.**
